SLIDING DOOR HANDLES

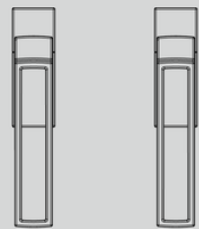

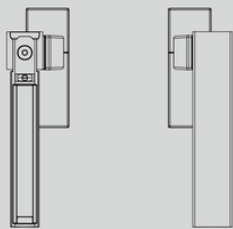

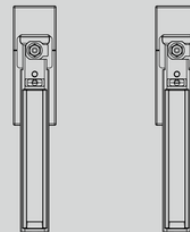

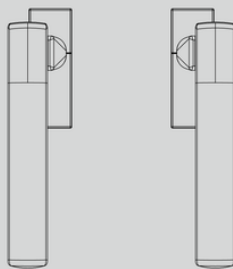

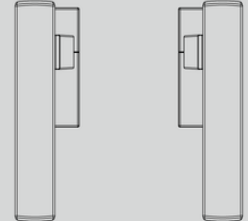

COMPACT

Reduced 84 mm base

Aluminium, PVC and timber joinery

Complies with standards EN 13126.3 and EN 13126.19.

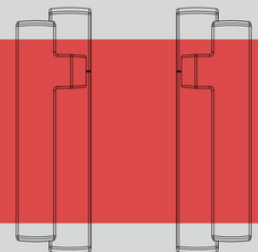

SOLENOX

Compatible with 7 mm square-shank locks with a 90° rotation

SABBA DEPORTED

Monobloc
20° manoeuvre

Our sliding door handles are compatible with all types of joinery, whether fitted as single or double handles. They are fitted to a 7 mm square spindle, with a 43mm fixing center distance.

The Compact version features a reduced base height of 84mm; and all our handles operate at a 20° angle for a smooth and ergonomic opening action.
