

SECURING LOCKS

S'HESTIA

EASY CONTROL

KEY

CONNECT

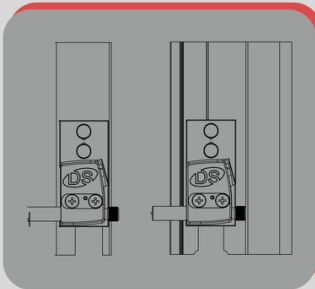

SIMPLY

Lock for sliding windows

Lockable with a key, either at the base or manually

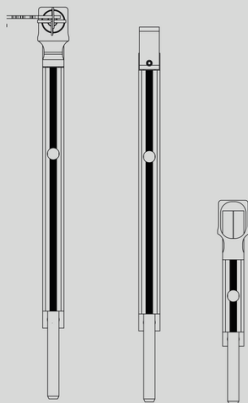

Cales

For fitting to flat and curved profiles

Allows the lock mounting to be moved away from the machining carried out on the central upright

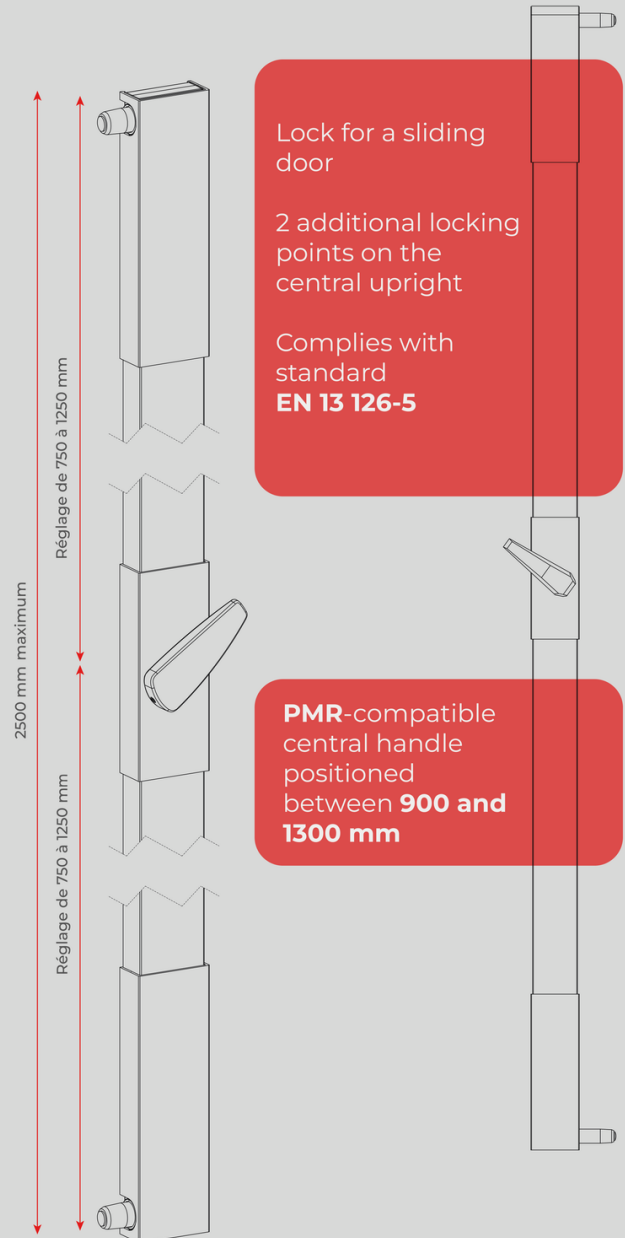

SELIOS

For corrosive environments and atmospheres such as **swimming pools** and **seaside** locations

Complies with the **NF90-309** standard

SECURBAIE

Lock for a sliding door

2 additional locking points on the central upright

Complies with standard **EN 13 126-5**

PMR-compatible central handle positioned between **900 and 1300 mm**

Our range of locks enables you to secure bay windows – a vulnerable point in a building – with solutions that are easy to fit, discreet and effective.

S'Hestia is fitted at the top or bottom of the central mullion, with various options available. The spacers allow S'Hestia to be fitted to a flat profile.

Securbaie is also fitted to the central mullion and allows you to lock at the top and bottom in a single movement.

Selios is a door lock designed to be fitted at the top or bottom. Selios is corrosion-resistant and particularly suitable for saline environments as well as swimming pool enclosures.
